

## Gear pumps – spares, repairs and replacements

### \* Replacement Witte gear pumps and parts

Replacement gear pumps and parts, with **dimensions identical** to the original, manufactured by Witte for other gear pumps (such as MAAG, LCI, Shimadzu, etc.).

- with identical design and metallurgy, or
- enhanced construction and/or longer life materials

**Spares** - many are available on overnight service, from the extensive stock in Witte's factory in Germany (European customers), elsewhere from local stock.

**Repairs /rebuilt** are best done in the Witte factory in Germany, where we can check all dimensions and prepare a technical report – including recommendations to improve pump life and/or performance – Witte or other makes of gear pump.

**Replacement Pumps** - we can frequently offer standard Witte pumps on ex-stock, or quick delivery as they are built in batches. However if you need a pump with identical dimensions (and fixings) to your existing pump, Witte can manufacture it for you.

(Witte can even come to your factory to remove the existing pump and replace with the new or rebuilt one).
